## Decorative slats

**Lamelas** are a decorative novelty in the interior design. Their minimalist design will find its application in any interior style. Lamellae are perfect as a single wall decoration, decorative openwork wall or as a ceiling decoration. Due to the fact that lamels are available in many sizes and wide range of colors - you will choose the perfect lamellas for yourself! By using our lamellas you can change your interior in quick and modern way!

# Lameo panels

LAMEO lamelas are made with unique attention to every detail. The slats are produced from the highest quality MDF with a durable four-sided laminate. The lamellas protect the walls against damage or dirt and they are easy-to-clean. LAMEO decorative lamellas are an excellent decoration for residential buildings, offices or public spaces. The possibilities of using our decorative panels are very wide. They can create a wall or ceiling composition, an openwork wall or any type of partition. The lamellas assembly is quick and very durable. The lamellas can be mounted with strong montage glue.

Modern **design**

Thanks to their simplicity, the lamellas fit into any interior style! It is the perfect wall finish in modern or rustic interiors.

Four-sided **laminated**

Thanks to the fact that the lamellas are laminated on all the four sides, you can mount them with any side to the wall or create a partition.

Easy to **assemble**

Wall lamellas are mounted with montage glue. Assembly is just 5 simple steps! - check the assembly instructions.

# Wall pannels

2750x300 mm

## Configure your panel

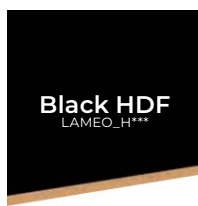

**Slatted panels** combine modern design with practical acoustic properties. Thanks to the slats mounted to the felt or HDF board, the panel perfectly absorbs sound waves in the room eliminating the echo effect. Each panel has six slats and is 30cm wide and 275cm high. The panels are extremely easy and quick to install. Simply cut them to the correct height and stick them to the wall or ceiling. In addition, the panels can be screwed to the wall with black screws. The lamellas are a timeless decoration for any interior!

# Veneered panels

2400x600 mm

Acoustic panels are a great option for people who are looking for something original and timeless to suit their interiors, whether installed in an office or a private home.

Veneer acoustic panels are manufactured from natural veneers. We offer eight colour variations of the veneered panels. The slats are made of black MDF covered on one side with natural veneer. The entire panel is constructed on sound-absorbing, high-grit felt.

## Wall lamella **Natural oak**

Decorative lamelas in natural oak color are the perfect solution for wood lovers in interiors. They perfectly fit in with wooden furniture or floor in any room. With their use, you will make a decorative wall behind the TV or the bed. You can glue the lamellas to the wall with both side: the narrower and wider. Natural oak-colored lamellas are laminated on four sides. Thanks to this, you can create not only a wall decoration, but also an openwork partition wall and their assembly is extremely easy.

## Instructions installation of slats

Use tools to cut the lamellas to the suitable length. Use a miter saw or hand saw and a miter box as tools.

Apply MAMUT mounting glue or TESA tape to the lamella. The glue should be applied to the lamella every 10 cm. One glue is enough to install 12-16 strips from the classic collection.

Glue the lamella to the wall keeping it vertical. Remember that the first strip affects the entire composition!

**MAMUT glue 290ml**

MAMUT

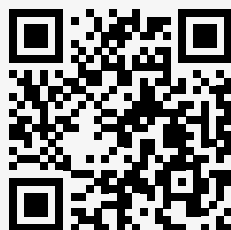

**Step 4**

Use the distances to determine the distance between the next lamella. Use previously cut strips as spacers. To hide the unevenness of the wall, you can use masking slats between the lamellas.

**Step 5**

Continue with the installation of the lamellas by using the spacers or by installing more masking slats between the lamellas.
